Earnings drivers year-over-year for the third quarter of 2021, as compared with 2020, were strong customer usage, as well as robust customer growth and constructive state regulatory actions. These impacts were partially offset by higher non-fuel operations and maintenance costs as the ongoing economic recovery resulted in a continuing return to more normal business operations. Earnings for the third quarter of 2021 were also significantly impacted by a \$197 million after-tax charge related to Georgia Power’s construction of Plant Vogtle units 3 and 4.

“The Southern Company system once again experienced outstanding operational performance in the third quarter of 2021,” said Chairman, President and CEO Thomas A. Fanning. “As the economies in our service territories continued to recover from the COVID-19 pandemic, we saw higher retail kilowatt-hour

sales at our state-regulated electric utilities, and we continued to experience strong customer growth in our Southeastern footprint.”

Third-quarter 2021 operating revenues were \$6.2 billion, compared with \$5.6 billion for the third quarter of 2020, an increase of 11.0 percent. For the nine months ended September 30, 2021, operating revenues were \$17.3 billion, compared with \$15.3 billion for the corresponding period in 2020, an increase of 13.7 percent. These increases were primarily due to higher fuel costs and the negative impacts of the COVID [1]19 pandemic on energy sales in 2020.
